### **DuPont: new enzyme product for biogas industry**

DuPont Industrial Biosciences announced the launch of a new enzyme product that will help biomethane producers by improve biogas yields and process robustness. The enzyme represents DuPont Industrial Biosciences's entry into the growing biogas sector, with an enzyme that has been shown to produce up to a 13 % increase in biogas yields in anaerobic digesters. The enzyme breaks down organic matter – like food, paper, animal and farm wastes – resulting in sugars more suitable for biogas-producing microorganisms.
